## CENTRAL ARMREST DISPLAY DEVICE

## **ABSTRACT**

A central armrest display device includes a body in the central armrest that

5 has a housing compartment with an opening directing rearwards to house and
anchor a case. The display device may be erected on the case for viewing or
housed in the case. The case can hold a multimedia player. Passengers on the
rear seat of a car can see multimedia programs on the display device mounting
on the central armrest.
